

An Offshoot To Liberate MINDS

Presented by:
Meric B. Mara, RHCE

- **Wine**
- **Phpsysinfo**
- **VirtualBox**
- **Clix**
- **Lotus Symphony**

We have **embraced Open Source**;
hence we are geared to open minds to
liberate enterprises and operate the way they should be.

Hi! My Name is **Juancho!**
Merix **Agenda** for Today...

Wine is an Open Source implementation of the **Windows** API on top of **X**, **OpenGL**, and Unix.

<http://www.winehq.org/>

phpSysInfo

phpSysInfo is a **PHP** script that displays information about the host being accessed.

It will displays things like Uptime, CPU, Memory, SCSI, IDE, PCI, Ethernet, Floppy, and Video Information.

<http://phpsysinfo.sourceforge.net>

VirtualBox is a general-purpose full [virtualizer](#) for x86 hardware. Targeted at server, desktop and embedded use, it is now the only professional-quality virtualization solution that is also Open Source Software.

<http://www.virtualbox.org>

The 8layer CLIX is a wise alternative in back-up solutions. It is designed to address the growing clamour for an easy to manage back up system and responds to the very demanding organization's back up needs for its individual users.

Lotus Symphony

What's in Lotus  ymphony products for you and your users?

The Lotus Symphony suite includes:

- Lotus Symphony Documents
- Lotus Symphony Spreadsheets
- Lotus Symphony Presentations

The suite can support the needs of individuals and enterprises at a reduced total cost of ownership.

Be Free. Work Smart.
